Say hello to GWM.

Overseas model shown.

GWM is a world-renowned vehicle manufacturer capable of designing and producing SUVs, utes and powertrains simultaneously. At GWM, everything we do is grounded in our corporate philosophy: ‘improving little by little every day.’

From building world-class research and development systems, which enable continuous innovation, to following the ‘excessive investment’ principle, which drives industry leadership, we relentlessly put our philosophy into practice. With nearly 8 million sales to date, in more than 170 countries (and counting), we are the No. 1 SUV brand in the world’s largest market and have been for the past 9 years. Our brand vision is to pioneer global mobility solutions, which use innovative technology to deliver a more pleasurable driving experience. Through innovation and global collaboration, we continue to improve our vehicles’ reliability, safety, performance, design and technology.

Timeless design. EV performance. Introducing the new classic.

It's not everyday that an electric vehicle comes along with such timeless design and potent power. Then again, it takes time to perfect an automotive classic such as this. The Ora is the ultimate statement in style and performance.

Overseas model shown.

Immortal styling. Modern luxury.

On the outside, the Ora looks unlike anything on the road today. Its sleek, curved contours are a nod to classic car designs of yesteryear. Yet its futuristic finishes including a signature brake light bar and LED tail lights innovatively positioned behind the tailgate glass, are just a few of the many modern features you'll discover. Inside, the plush power-adjustable leatherette seats provide the ultimate in comfort. The two-spoke designer steering wheel is luxurious to handle. And the location of cabin instruments, display screens and all electronic dials are remarkably well thought out.

Potent performance.

Driven by a single, front-mounted electric motor capable of deploying 126kW of potent power and 250Nm of torque, the Ora is the perfect EV city slicker. Available in two options, the standard range model comes with a 48kWh Lithium-Ion battery delivering a driving range of up to 310km* (WLTP) and a rapid charge time from 10%-80% in just 41 minutes[^]. While the extended range model uses a 63kWh battery, has a driving range of up to 420km* (WLTP), and a rapid charge time from 10%-80% in only 50 minutes[^].

* Indicative driving range using the new WLTP test procedure. Figures obtained after the battery was fully charged. Figures stated for the purposes of comparison amongst vehicles tested to the same technical procedures only. Actual real world driving range may vary depending on factors such as battery age and condition, driving style, use of heating/cooling, traffic conditions, weather conditions, any accessories fitted and vehicle load.

[^] Charging time is based on, and requires use of a 80kW DC charger. Charging time will be dependent on charging conditions, including DC charging type and condition, battery temperature and size as well as ambient temperature at point of use.

Trailblazing technology.

The Ora is as innovative as it is intelligent. For a start, you don't have to start it. Just climb into the driver's seat, put your foot on the brake, select 'Drive' and you're off. And once you're away, this smart EV has a tonne of tech to keep you engaged and entertained. For example, the Ora lets you select Single Pedal Drive mode and will automatically slow the car for you, eliminating the need to brake at all, which is great in slow moving traffic. Plus, dual 10.25" screens are the perfect accompaniment to every outing with one screen serving as a driver display including speedometer and live speed limit information, while the other contains all your infotainment functions like Apple CarPlay and Android Auto.

Convenient Steering Wheel Controls

High-Def 10.25" Instrument Cluster

Wireless Phone Charging On-the-Go

Stylish Chrome Control Switches

Built to the safest standards.

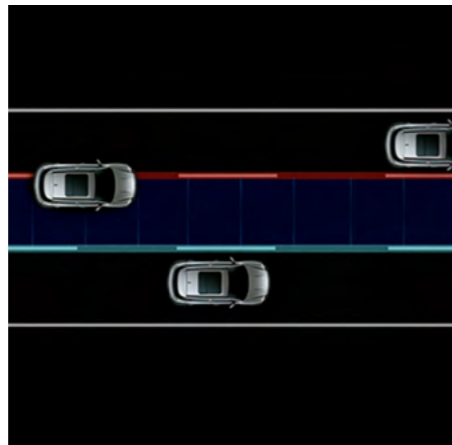

Like all GWM vehicles available in Australia, the Ora has achieved the highest possible 5 star safety rating by ANCAP in 2022, with a comprehensive suite of safety systems and features designed to protect you and others on the road. These include Camera-based Driver Drowsiness Detection, Traffic Sign Recognition, Intelligent Adaptive Cruise Control, Lane Keep Assist, Lane Departure Warning, Rear Cross Traffic Alert, and 360 Degree cameras giving you a complete view of your vehicle's entire surroundings. All of which combine to give you peace of mind knowing that GWM is looking out for you and everyone else around you every time you drive.

Lane Centre Assist and Lane Center Keeping

Cameras and sensors detect lane markings and keep the vehicle centred.

Lane Departure Warning

Monitors the vehicle's position within its lane and alerts when it begins to drift out of it.

Rear Cross Traffic Alert

Detects approaching vehicles from the sides when reversing and alerts to prevent collisions.

360 Degree Camera

Provides a bird's-eye view of the vehicle to aid parking and manoeuvring in tight spaces.

Adaptive Cruise Control

Automatically adjusts the speed of the vehicle to maintain a safe distance from the vehicle ahead.

Blind Spot Monitoring

Detects vehicles in the driver's blind spot and alerts with visual or auditory signals to prevent collisions.

GWM's entire electrification roadmap is spearheaded by its very first 100% electric vehicle, the Ora. Powered by a highly efficient and incredibly reliable Lithium-Ion battery, this new energy technology is capable of delivering far greater performance with exceptionally quiet, almost silent, results. Perfect for urban driving, the fast charging, planet-friendly, one-speed automatic transmission provides responsive take-offs and superior acceleration when you need it, all the while saving on fuel. Backed by advanced technology and safety, the Ora is the next generation of electric vehicles.

Driven By A New Energy - 100% Electric.

The all-new Ora is available in a range of stunning contemporary colours, for all makes and models.
